

- ⊕ New colors of GLAX LED strip profiles give every arrangement a unique cohesion and modern character. The new color variant – matte black – includes the most popular profiles: wardrobe rails, surface-mounted (also micro), corner, and recessed corner – now available in an even more stylish version.

- ⊕ GLAX means consistency in every detail – the range of profiles is complemented by color-matched accessories: covers, end caps (also versions with cable holes), and a rosette. Thanks to them, you can easily create a harmonious and elegant lighting composition in any type of furniture.

- ⊕ Black GLAX profiles perfectly match furniture in shades of black, brown, or anthracite, while also creating a subtle decorative contrast with light surfaces. It is a detail that attracts attention and emphasizes the character of the interior. Deep black adds sophistication, turning any space into an elegant and stylish storage zone.

- ⊕ The wardrobe rail profile is an ideal solution for wardrobes and closets. It combines the function of a clothes rail with LED lighting, ensuring convenience and a unique visual effect. The GLAX surface-mounted profile is an excellent solution for illuminating wardrobes or closets. It is used as lighting for shelves, niches, or suspended cabinets.

- ⊕ The recessed corner profile can be used, for example, to illuminate a kitchen countertop or brighten the interior of deep cabinets or wardrobes. The corner profile is used in furniture corners, most often under wall cabinets in the kitchen and under shelves in wardrobes.
